

Hands-ON workshop on Crispr/Cas Technology and Genome Editing

July 12th-18th 2022

BLiSC Campus - National Center for Biological Sciences,
Bangalore-India

- Basics in genome editing, molecular biology techniques
- In silico tools for sgRNA design and synthesis
- Knock-IN construct strategies
- Target Validation assays
- Target sequence alignments and analysis
- Mouse embryo micro-Injection & electroporation demonstrations

Workshop Registration Fee:

- 7000 Rs (academic students & scientists)
- Academic PG or PhD level students meeting SERB Karyashala scheme requirements can be eligible for travel & accommodation allowance and have access to free registration. See application form for details.
- 15000 Rs (private / non-academic)
